Education

Sardar Patel Institute of Technology (SPIT) — Mumbai, India
Master of Computer Applications (MCA) | ***CGPA: 8.09*** — *2025 – 2027*

Thakur Ramnarayan College (TRCAC) — Mumbai, India
Bachelor of Science in Information Technology | ***CGPA: 7.77*** — *2022 – 2025*

Projects

ForgeAgent – AI No-Code Chatbot Builder · *RAG · PostgreSQL · pgvector · Supabase* 2026

- Built a multi-tenant RAG platform where users create isolated chatbots, with PostgreSQL Row-Level Security keeping each user's data separate.
- Built a document pipeline for PDFs, Markdown, text, and URLs that chunks content, creates 1,536-dimension embeddings, and stores them in pgvector.
- Implemented hybrid search that combines vector similarity with full-text search using Reciprocal Rank Fusion.
- Created an embeddable chat widget with configurable branding and source-grounded answers, with fallback across multiple LLM providers.

Dexter Write – AI-Connected LaTeX & Markdown Editor · *TypeScript · Yjs · MCP · OAuth 2.1 · Lambda* 2026

- Built a browser-based LaTeX and Markdown editor with split-screen live preview, syntax highlighting, and real-time Yjs (CRDT) collaboration over WebRTC.
- Built an MCP (Model Context Protocol) integration that lets Claude, ChatGPT, and Antigravity read and edit projects through one shared local bridge, plus a hosted OAuth 2.1 connector that works without a local server.
- Added safe AI editing with version checks, revision history, one-click undo, and allowlist controls so assistants cannot silently overwrite work.
- Extended the AWS Lambda/Docker XeTeX compiler to compile cloud-synced projects and return a signed PDF after AI edits.

FitGo – Offline-First Fitness Tracker · *Flutter · Dart · Supabase* 2026

- Built an offline-ready app that lets users smoothly track their daily calories, fasting times, and water intake, even without an active internet connection.
- Added secure user login and automated cloud backups via Supabase, ensuring personal data is safely saved and restored across multiple devices when online.
- Added offline log storage and automatic syncing when connectivity returns.

Technical Skills

Languages: Java, C++, SQL, TypeScript/JavaScript
Frontend: React, Flutter, HTML/CSS
Backend: Node.js, Express.js, Spring Boot, REST APIs
Databases: PostgreSQL, MySQL, Supabase (Auth, RLS, Edge Functions), pgvector
AI/LLM: RAG, embeddings, vector search, MCP, LLM security
Cloud/DevOps: Git/GitHub, AWS (Lambda, S3, EC2), Docker, Kubernetes

Achievements & Extracurricular Activities

Winner — *Alkimi FWD 2025* – Built a Sui-based auction platform in hackathon.
LeetCode — *Solved 300+ coding problems across data structures, algorithms, and SQL.*
LLM Security — *Explored prompt injection, jailbreaks, and mitigation techniques in RAG applications.*
