Education

Sardar Patel Institute of Technology (SPIT) — Mumbai, India
Master of Computer Applications (MCA) — *2025 – 2027*

Thakur Ramnarayan College of Arts & Commerce — Mumbai, India
Bachelor of Science in Information Technology — *2022 – 2025*

Relevant Coursework

- Data Structures
- Algorithms
- Database Management
- Operating Systems
- Advanced Java
- Cloud Computing
- Computer Networks
- System Design

Projects

ForgeAgent – AI No-Code Chatbot Builder · *RAG · PostgreSQL · pgvector · Supabase* — 2026

- Built a multi-tenant SaaS platform enabling users to create and deploy RAG-powered chatbots through a no-code bot creation flow.
- Engineered document ingestion pipeline with chunking, embedding generation, and pgvector-based semantic search for grounded responses.
- Built embeddable real-time chat widget with theme customization, analytics dashboard, and fallback workflow for unresolved queries.

ChainSight – Historical Data Warehouse Backend · *Java 21 · Spring Boot · PostgreSQL · Redis* — 2026

- Built a Java 21 Spring Boot backend for historical Ethereum data ingestion using Web3j, Flyway migrations, PostgreSQL warehouse tables, and JdbcTemplate batch writes.
- Implemented restart-safe data ingestion with checkpointing and duplicate handling, using concurrent thread pools for parallel processing and Redis for coordination.
- Built analytics REST APIs with SQL aggregations, Redis caching, JWT authentication, and Dockerized deployment on AWS EC2/RDS.

FitGo – Offline-First Fitness Tracker · *Flutter · Riverpod · Hive · Supabase* — 2026

- Built an offline-first Flutter app for calorie, fasting, water, activity, sleep, and weight tracking with Riverpod state management and Hive persistence.
- Implemented Supabase authentication and cloud sync for profiles, daily metrics, weight entries, and app settings while preserving local-first behavior.
- Added analytics dashboard with consistency score, weekly calorie budget redistribution, trend charts, and native Android reminder workflows.

Technical Skills

Languages: Java, C++, SQL, TypeScript, JavaScript
Backend: Spring Boot, Node.js, REST APIs
Frontend: React.js
Databases: PostgreSQL, MySQL, Redis, Supabase
Data/AI: ETL, RAG, LLMs
Cloud & DevOps: AWS (EC2, S3, RDS), Docker, Kubernetes, CI/CD

Certifications

Machine Learning | *NPTEL – IIT Madras* | Prof. Balaraman Ravindran
Big Data Computing | *NPTEL – IIT Patna* | Prof. Rajiv Misra
Coding Theory | *NPTEL – IIT Kanpur* | Prof. Adrish Banerjee

Achievements

LeetCode | *Solved 250+ problems in Data Structures, Algorithms & SQL* — 2026
Runner Up | *Alkimi Move FWD Hackathon* — 2025
